

# X Series

## ADVANCED ALUMINIZED PROTECTIVE APPAREL

The X Series represents the most significant step forward in extreme protective apparel in decades. Designed for superior fit, comfort, and protection, these suits feature the latest advances in material science and apparel design. The X Series offers a solution for nearly any application, starting with the ultra-lite X10 single layer proximity suit for furnace operations and metal pouring to insulated suits for more severe temperatures, firefighting, and industrial operations. All X Series suits feature an advanced Z-Flex® Multilayer Aluminized performance outer shell which delivers lightweight protection from extreme radiant heat and has proven to outperform and outlast all other radiant protective fabrics. Whatever your high temperature challenge - protect the people that matter most with the X Series.

*X Series suits are designed for use in a wide range of industries & applications including steel & metal works, furnace, glass, & foundry operations, petrochemical and power generation plants, aircraft rescue, specialized firefighting, and emergency response.*

Style	Suit Type	Aluminized Shell	Liner	Thermal Layer(s)	Weight (Nominal)*	
<b>X10</b>	Ultra-Lite Proximity	Z-Flex K-270 Aramid	—	—	4 lbs	1.8 kg
		Z-Flex R-480 Rayon				
		Z-Flex O-500 O-PAN				
<b>X20</b>	Lightweight Proximity	Z-Flex A-601	FR Cotton	—	13 lbs	6.0 kg
			Neoprene			
<b>X30</b>	Industrial Proximity	Z-Flex A-601	Quilted Nomex®	—	17 lbs	7.8 kg
	Attack Proximity Firefighting		Tencate Aralite® NP			
<b>X40</b>	Insulated Proximity	Z-Flex A-601	FR Cotton	Z-Flex F-628 AF Foil & Fiberglass Insulation	25 lbs	11.3 kg
			Quilted Nomex®			
<b>X50</b>	Fire Entry (Short Duration)	Z-Flex A-601	Neoprene	Z-Flex F-628 AF Foil & Fiberglass Insulation	46 lbs	20.9 kg
	Kiln Maintenance					
<b>X60</b>	Fire Entry (Advanced)	Z-Flex A-601	FR Cotton	Pyron® Insulation, Z-Flex F-628 AF Foil & Fiberglass Insulation	55 lbs	24.9 kg

\*The nominal suit weight is the total approximate weight of a jacket, pants, boots, gloves & hood. For comparison purposes only, actual weights may vary slightly.

Style	Suit Type	Cert.	TPP <sup>1</sup>	Features
<b>X10</b>	Ultra-Lite Proximity	ISO 11612	9 - 11	<ul style="list-style-type: none"> <li>• <b>Jacket:</b> Set-in sleeves, narrow collar, snap adjustments on sleeves</li> <li>• <b>Pants:</b> Sewn-in suspenders</li> <li>• <b>Optional:</b> Hood, boot covers, and gloves can be purchased separately.</li> <li>• The X10 Ensemble includes only jacket and pants.</li> </ul>

**Thermal Protective Performance [TPP]¹:** The TPP test exposes samples to convective and radiant heat sources. The heat transferred through the test specimen is measured and used to calculate a tolerance time to 2nd degree burn. The levels of exposure are extreme in the TPP test scenario and are not representative of most real world scenarios. The test is intended to show relative protective values of the X Series suits in relation to each other.

**Sizing:** X10, X20, X30, and X40 suits come standard in Small, Medium, Large, and X-Large sizes. 2XL and custom sizes are available for an upcharge. X50 and X60 suits come standard in One Size Fits Most (up to XL); Custom sizes are available for orders of 5 or more, with upcharge.

For nearly 40 years, Newtex has been a pioneer and leading global producer of high performance materials and engineered solutions for thermal management and fire protection. Headquartered outside of Rochester, New York, Newtex is an ISO 9001:2008 certified, vertically integrated manufacturer of an impressive portfolio of heat and fire resistant fabrics, tapes, personal protective apparel, and custom high temperature solutions. We are a minority owned, veteran-managed business that has proudly served the US Armed Forces and leading global industries since 1978. Newtex products are proudly made in the USA.
